

Back Office: Batch Correction

Scenario

EBM is frozen when brought in, and quantity is estimated. Upon defrosting, quantity is clearly different, and needs to be corrected.

You have logged into the Back Office.

Instruction

1. Select **Batch correction**
2. Check that the dates shown include the date the EBM was collected
3. Click **Apply filters**
4. Select the patient (baby) that you wish to do batch correction for.
5. Click **Edit**
6. A new window should open:

7. The **Quantity** (ml) can now be altered
8. Click **Save**
