

Postnatal Assessments (Community)

To commence a postnatal assessment

1. Select the **"Postnatal"** tab from the side-bar
2. In this section, click onto red cross and select **"Postnatal Assessment (Community)"**
3. This will then load the postnatal assessment smart form. Ensure to complete all sections of the **"On Arrival"** including a reason for the assessment. If seeing both mother and baby at an assessment, ensure to check both.
4. Continue down the smart form onto **"Assessment"** and complete all relevant information.
5. Complete **"Recommendations"** as this is your risk assessment. Ensure to authorise this with your username and password. If nothing has changed, ensure you still authorise this to say you have acknowledged the risks.
6. To complete the baby assessment, scroll down within the side-bar on the right and identify the **"Baby Links to Forms"**. Complete all relevant information required by clicking and completing each form separately.
- 7.
8. After you have completed all baby forms (Daily examination, feeding updates/feeding assessments and risk assessment) you will return to the postnatal assessment smart form. Ensure to complete **"On leaving"** to close the postnatal assessment.
9. Update personal timeline and add leaflets if required
10. Add follow up appointment
11. Upload and publish information to Badger Notes
12. Review things to do before finishing
