

MSW Guide to Community

Antenatal Checks

If you are working with a midwife in the clinic, you will be required to log your blood pressure and urine readings within the antenatal assessment tab. Below is a guide on how to load the patient and input this information.

- 1. Log in with computer user name and password
- 2. Find patient using NHS number only (to ensure you are not using a duplicate record)

+

- 3. Select the Notes during Pregnancy tab on the left-hand side
- 4. To add/start a new assessment click on the plus
- 5. Click and select Antenatal Follow-up

-On Arrival

Additional Notes of	n Arrival

- 6. Complete Date and Time of Assessment
- 7. Complete Reason for Assessment
- 8. Complete if **Scheduled visit**
- 9. Complete Midwife who is carrying out assessment
- 10. Complete Type of Assessment
- 11. Complete Location
- 12. Complete Others present at assessment
- 13. Complete Urinalysis Carried Out

- 14. Complete Urinalysis Outcome
- 15. Complete Weight if appropriate
- 16. Complete Carbon Monoxide offered and level when taken
- 17. Complete Blood pressure
- 18. On the right-hand **"Follow-up Events"** menu you can add **"Follow-up Appointment"**. Once you have completed the information for the appointment, save and close to go back to the assessment. The midwife will then be required to fill in the rest of the assessment.

Blood tests/Microbiology tests

If you are required to complete blood tests/urine tests within a clinic when a midwife is present you can easily access these within the open **Antenatal Follow-Up.** Within the right-hand side-bar within the assessment, scroll down to **Other Events.**

Other Events

- → Blood Tests and Results→ Microbiological Tests and
- Results
- Vaginal Examination (Antenatal)

To complete a blood test -

- Complete "Offered and Explained"
- Select "All Accepted and taken" if you have taken these bloods and the time offered will pre-populate.
- Select your name in "Screening offered by"

-Offered -		
	Time of Note	25 Nov 22 🔽 at 09:39 Gestation 9weeks, 0days
	Offered and Explained	
		All accepted All accepted and taken
	Date and Time Offered	at at
	Screening Offered By	
		Superative Contract State Stat
Screening O)ffered - Midwife's Team	

- Scroll down to "Accepted"
- Complete "Bloods taken" section in full to include location of sample/hospital of sample.
- Ensure you put your name in the "Taken By" section
- Save and close to go back to assessment

To complete a MSU within the midwife clinic

- Select "Microbiological Test and Results" from the other events.
- Complete Location
- Complete Test offered and explained
- Select "Accepted" for the box below to populate
- Save and close to go back to the assessment

Completing Blood tests/Microbiological tests outside of Midwife Clinic

If you are seeing a woman alone to complete a blood test:

- Find woman using NHS number
- Find "Enter new note" and type in "Blood Test and Results"
- Open up the blood note and complete in full
- Ensure to complete the paper form as normal

Microbiological tests

- Find woman using NHS number
- Find "Enter new note" and type in "Microbiological Tests and Results"
- Open up the Microbiological note, complete in full
- Ensure to complete the paper form as normal

Postnatal Care

Please ensure that before you visit someone in the community you have downloaded them to the offline menu. (*Please see the separate user guide on offline usage for this.*)

- 1. Find woman using NHS number
- 2. Go to postnatal tab

- 3. Select the red cross
- 4. Select "Postnatal Assessment"
- 5. Complete Type of Assessment
- 6. Complete Location
- 7. Complete **Assessment Reason** Ensure if you are just seeing the baby you select "baby" and if you are seeing both, select "mother" too.

Assessment Reason		
Carried Out By (Postnatal care - mother Postnatal care - baby 	
	Community	
Team	Breastfeeding support	
Present at Assessment	Bereavement counselling	
	Debrief	
Consent for Procedures	Y NIPE/Detailed exam check	

- 8. Complete Carried out By
- 9. Complete Others present at the assessment
- 10. Next scroll down the right-hand menu and find "Mother Links to forms"

Observations for Mother

This note will only need to be completed if you are sent to do a postnatal blood pressure or the woman has a specific concern you need to escalate to a midwife.

Mother Links to Forms

- Observations
- Postnatal Conversations
- Postnatal Education
- Blood Tests and Results
- Microbiological Tests and
 - Results
 - 11. Complete Observations (if required to do postnatal blood pressures/observations) or input any information a woman has told you about herself which needs action.

- 12. Ensure to complete "additional notes" if any actions need to be taken such as escalating to midwife
- 13. Save and close mother assessment to go back to assessment

Baby assessments

Baby assessments can be found within the postnatal assessment you created above. Below the "Mother Links to forms" you will see "Baby Links to Forms"

- 1. To complete examination on baby, select Daily Exam
- 2. Within here make sure to complete:
- Examination time
- Baby examined by
- Location Examined
- Weight (if you are weighing the baby) the percentage of weight loss will automatically calculate.
- 3. Feeding support forms (AF/BF)
- **Feeding update** for every woman if you are attending for feeding support. Within the feeding update, you can access other feeding forms.
- Breastfeeding Observation Checklist for an in-depth feeding assessment when problems are highlighted.
- Baby feeding assessment to assess how feeding is going (urine output, number of feeds etc)
- Enter additional notes into each assessment if required
- Baby feeding plan if you are required to write a plan for next visit or next support contact

Baby Transcutaenous Bilirubin

If a baby requires a Transcutaenous Bilirubin to be completed in the community, please ensure you complete the relevant form so this can plot into the chart required. The form to input this measurement can be found under the **Baby Links to Forms** as below:

Baby 1 - Clinical Note	
Baby 1 - Transcutaneous	
Bilirubin Test	

It can also be accessed by using "enter new note" and searching for bilirubin

Enter new note	Search M
Pregnancy Summary	
Notes During Pregnancy	Baby Notes
Fetal Medicine	☑ Transcutaneous Bilirubin Test
Triage (BSOTS)	

To complete the form, ensure the baby is suitable and tick that the baby is not in the unit. Complete the level and save and close. This will then plot onto the Bilirubin chart for viewing. After you have completed this level, follow the current guidance.

- Transcutaneous Biliru	ubin Date of test	02 Dec 22 💌	<mark>at 14:</mark> 0	2 Postnatal 2weeks, 0days		Date Recorded: 24 Nov 22 at 12:46
