

Research User Guide

1. Log into BadgerNet using your computer username and password
2. Select existing woman's record using NHS number only (this is to ensure there is no chance of duplication of record from another BadgerNet site which is a part of the single pregnancy record).

3. Once in the Badger record use the 'enter new note' feature to search for:

Personal Timeline- use this to sign post women to information/leaflets. For example information regarding research trails. Scroll down to current gestation of the woman to add this to the additional reading section.

Research Project- use this to note to record when a woman is participating in a research trail

Critical Alert- use this to highlight that a woman is participating in particular research trials. This will display on the bottom alerts banner on the pregnancy summary page to highlight this to clinicians accessing the record.

Specialist review- use this to record any discussions regarding research that is had with the woman

Communication- use this to record any phone calls regarding the patient

Observations- use this to record any observations you need to document
