Great North Care Record

North East and North Cumbria Local Maternity System

BadgerNet now has a link to the Great North Care Record (GNCR) so you can access more information about your patients. This includes information from the GP record in addition to data from other trusts such as appointments, diagnoses, referrals and test results.

To access the GNCR, click on the GNCR Portal link in BadgerNet.

The screenshot displays the BadgerNet interface for a patient named MORRISON, DOROTHY. The patient's details include NHS No 962 034 4472, Gender Female, Born 10/02/1971 (51y). The interface shows various tabs for viewing records, including GP Records, Additional GP Records, Future Appointments, Allergies & Adverse Reactions, Medications, Past Meds, Meds Issues, Vaccinations, Problem List, Social Care, Community, Mental Health, Clinical Correspondence, Encounters, Lab results, Radiology, Cellular Pathology, and Microbiology. The interface also includes a sidebar with navigation options like Reports, Charts, and Administration. The bottom of the screen shows the user's role as Administrator and the date 25 Feb 22 14:06.

If you are new to using GNCR and would like a training session, please request one by contacting nuth.gncr@nhs.net
