

Badgernet client description

The first time logging on, the BadgerNet client asks to fill in the “Description”. This should be “Newcastle, RVI” as this will later on appear together with the PC name on the Medico-Legal report:

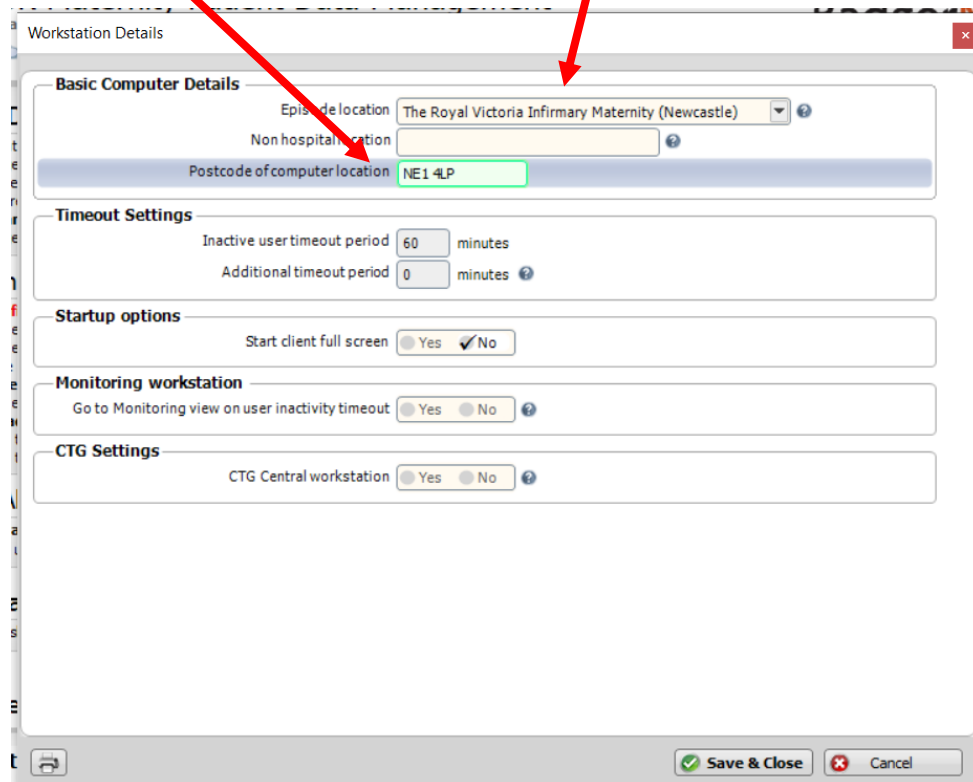

A screenshot of a 'Workstation registration' dialog box. It contains a message: 'The workstation that you are currently using does not appear to have been registered with the BadgerNet platform. Before continuing, please enter the information requested below.' There are two input fields: 'Workstation name' with the value '5CG8371S1J' and 'Description' with the value 'Newcastle, RVI'. At the bottom right are 'OK' and 'Cancel' buttons.

Only Clevermed can change the description once it has been entered. For this, they will need to be given the PC name the client is installed on.

Badgernet local client: Workstation details

These can be changed by the users themselves. The **Episode location** must be our care location as otherwise the GNCR viewer will not work.

The **Postcode of computer location** MUST be NE1 4LP.

A screenshot of a 'Workstation Details' dialog box. It has several sections: 'Basic Computer Details' with 'Episode location' (The Royal Victoria Infirmary Maternity (Newcastle)), 'Non hospital location', and 'Postcode of computer location' (NE1 4LP); 'Timeout Settings' with 'Inactive user timeout period' (60 minutes) and 'Additional timeout period' (0 minutes); 'Startup options' with 'Start client full screen' (Yes/No, No selected); 'Monitoring workstation' with 'Go to Monitoring view on user inactivity timeout' (Yes/No, No selected); and 'CTG Settings' with 'CTG Central workstation' (Yes/No, No selected). At the bottom are 'Save & Close' and 'Cancel' buttons. Two red arrows point to the 'Episode location' and 'Postcode of computer location' fields.
